

PACESETTER 990 RB

2oz Mild Acid Fountain Concentrate

DESCRIPTION:

Pacesetter 990 RB is a mild acid fountain concentrate for use in Newspaper and Coldset web applications with brush or conventional sock dampening. This product was designed to run at 2 ounces per gallon and is specially formulated with gum, and superior desensitizers to provide excellent restarts. Pacesetter 990 RB has a unique biocide package to control biological growth of all types. This product contains low VOC's and is an environmentally friendly product.

BENEFITS OF PACESETTER 990 RB:

- Provides superior restarts
- No VOC's
- Can be used on all types of dampening systems
- Excellent control of biological growth
- Provides better ink and water balance
- Contains gum

USE DIRECTIONS:

Start with 2 ounces per gallon of Pacesetter 990 RB. Increase dosage by 0.5 oz./gallon if plate sensitivity occurs, decrease dosage if there is roller stripping or ink emulsification.

The conductivity will increase by 650 micromhos over the waters conductivity for each ounce used. The pH should be in the 4.5 to 5.2 range depending on the water.

TECHNICAL DATA:

Appearance: Clear brown

VOC Content: 3%

pH, Diluted: 4.5 – 5.2

Conductivity: 650 micromhos per ounce

Density: 9.3 lbs/gal
