

PACESETTER 993 TURBO HW

2oz Mild Acid fountain concentrate

DESCRIPTION:

Pacesetter 993 Turbo HW is a mild acid fountain concentrate for use in Newspaper and Coldset web applications with hard water, especially on Man Roland presses with Turbo dampening. This product was designed to run between 2 to 3 ounces per gallon and is specially formulated with superior desensitizers to provide excellent restarts and will also control foaming issues in the turbo unit. Pacesetter 993 Turbo HW has a unique biocide package to control the biological growth on this specific dampening system. This product is very low in VOC's and is an environmentally friendly product.

BENEFITS OF PACESETTER 993 TURBO HW:

- Provides superior restarts
- Low in VOC's
- Effective on Turbo dampening systems
- Excellent control of biological growth and foaming
- Provides superior ink and water balance
- Use with hard water types

USE DIRECTIONS:

Start with 2 ounces per gallon of Pacesetter 993 Turbo HW. Increase dosage by 0.5 oz./gallon if plate sensitivity occurs, decrease dosage if there is roller stripping or ink emulsification.

The conductivity will increase by 550 micromhos over the waters conductivity for each ounce used. The pH should be in the 4.5 to 5.2 range depending on the water.

TECHNICAL DATA:

Appearance: Clear light pink

VOC Content: 3%

pH, Diluted: 4.5 – 5.2

Conductivity: 550 micromhos per ounce

Density: 9.1 lbs./gal
