

SAFE 3038 S

Web Acid Fountain Concentrate

DESCRIPTION:

Safe 3038 S is an acidic fountain concentrate designed for use on continuous and duotrol type dampening systems on all types of web presses. This product contains a blend of desensitizers and unique wetting agents to provide excellent restarts, minimize ink feedback, and provide a wide operating window. Safe 3038 S contains additives that makes it more compatible with the most difficult to run paper stocks. This product contains biocides and corrosion inhibitors for a trouble free dampening solution.

BENEFITS OF SAFE 3038 S:

- Compatible with all types of presses
- Provides excellent ink and water balance
- Superior plate protection
- Excellent restarts
- Less paper waste
- Compatible with alkaline paper stocks

USE DIRECTIONS:

Start with 6 ounces per gallon of Safe 3038 S and adjust dosage for optimal performance. Increase dosage if plate sensitivity occurs, decrease dosage if roller stripping or ink emulsification occurs. Each ounce of Safe 3038 S will increase the conductivity by about 525 μ mhos. The pH of the press mix will be in the 4.0 to 5.0 range depending on the water.

TECHNICAL DATA:

Appearance: Clear blue-green

VOC Content: 7.0%

pH, Diluted: 4.0 – 5.0

Conductivity: 525 μ mhos per ounce

Density: 8.8 lbs/gal
