

PERFECT CLEAN DAMPENING CLEANER

PRESS DAMPENING SYSTEM CLEANER

DESCRIPTION:

The Perfect Clean Dampening Cleaner is a cleaning agent used for cleaning biological growth, ink and other contaminants from the press dampening system. This product contains agents that will effectively remove biological growth such as bacteria, yeast, and mold. Perfect Clean Dampening Cleaner is easy to use, low in odor, and will not foam during the cleaning process. The cleaner is environmentally friendly and disperses readily with cold or hot water.

BENEFITS OF PERFECT CLEAN DAMPENING CLEANER:

- Highly effective
- No Foaming during cleaning
- Completely dispersible in water
- Low in odor
- Effective in all systems

DIRECTIONS:

- Dilute 10:1 to 20:1 depending on difficulty of job.
- Fill recirculating tank with hot water(preferred) or cold water if hot is not available. Add the Perfect Clean Dampening Cleaner at the proper dilution.
- Recirculate for 15 to 30 minutes, longer if needed. Dump solution.
- Refill tank with hot water and recirculate for another 15 to 30 minutes and dump. A second rinse of the system would be best.

TECHNICAL DATA:

Appearance: Clear

Odor: Mild glycol ether

VOC Content: 19.9%

Density: 1.02 g/ml
