

PLATE CLEANER

ALKALINE PLATE CLEANER

DESCRIPTION:

Plate Cleaner is an alkaline plate cleaner that is designed to either be used by hand or as an “On the Fly” type cleaner to remove ink and plate sensitivity. This product contains additives and desensitizers that will effectively remove ink and contaminants from the plates’ non-image area and will provide a fast clean startup or restart. Plate Cleaner is easy to use and can be rinsed readily with water.

BENEFITS OF FAST START PLATE CLEANER:

- Highly effective
- Compatible with many plates
- Easily rinses with water
- Minimal odor
- Great desensitizer

DIRECTIONS:

- **For best results: Spray onto the water form roller or dampening system to remove plate sensitivity.**
- Plate Cleaner can also be applied with a dampened sponge or rag.
- Wipe across entire plate surface until ink and contaminants are removed.
- Reapply if necessary.

TECHNICAL DATA:

Appearance: Clear water white

Odor: slight glycol ether odor

VOC Content: 6%

Density: 1.02 g/ml
