

UV 103 WASH

UV BLANKET AND ROLLER WASH

DESCRIPTION:

The UV 103 is a highly effective wash for cleaning of UV and LED inks from rubber rollers, blankets, and press parts. This product is user friendly, is low in odor, and moderate evaporator. The UV 103 contains agents to clean UV ink, paper, and other contaminants from all types of rollers and blankets. This product can be used on sheetfed and web applications.

BENEFITS OF UV 103 WASH:

- Strong effective cleaner
- Apply Straight
- User friendly with low odor formulation
- Great for all types of Sheetfed and Web Presses
- Medium evaporation and leaves no residue
- Great for UV and LED inks
- Can be used on conventional inks

USE DIRECTIONS:

Apply straight using a lint free rag or cloth on blankets. Apply straight on ink roller train and engage wash up blade, follow it up with a second application for difficult jobs. For use on all sheetfed and web press blankets and rollers.
