

UV 109

UV BLANKET AND ROLLER WASH

DESCRIPTION:

The UV 109 is a highly effective wash for cleaning of UV and LED inks from rubber rollers, blankets, and press parts. This product is user friendly, is low in odor, and will evaporate quickly. The UV 109 contains agents to clean UV ink, paper, and other contaminants from all types of rollers and blankets, especially EPDM types. This product can be used on sheet-fed and web applications.

BENEFITS OF UV 109:

- Strong effective cleaner
- Apply Straight
- User friendly with low odor formulation
- Great for all types of Sheet-fed and Web Presses
- Fast evaporation and leaves no residue
- Great for UV and LED inks
- Can be used on EPDM rubber rollers and blankets

USE DIRECTIONS:

Apply straight using a lint free rag or cloth on blankets.

Apply straight on ink roller train and engage wash up blade, follow it up with a second application for difficult jobs.

For use on all types of sheet-fed and web presses.

TECHNICAL DATA:

Appearance: Clear liquid

VOC Content: 100%

Odor: mild alcohol

Density: 0.88 g/ml

Product Formula #: CW-50149
