

PRINTER SOLUTION 60

SILICONE EMULSION SLIP AGENT

DESCRIPTION:

The Sprinter Solution 60 emulsion is a mixture of polydimethylsiloxane emulsion and biocide agents for use in the heatset web market to treat the web of paper to prevent marking and add slip for the folding of paper. This product is diluted in water and is effective in a wide variety of systems to prevent marking, static buildup, and help with the “jogging” of the paper. This product contains anti-microbial agents to help with growth on all types of presses and at all speeds.

BENEFITS OF SILICONE 60 SAS:

- Highly effective at low concentrations
- Concentrated – 60%
- Easily diluted in water with mild agitation
- Will not cause discoloration
- Effective on high speed applications
- Prevents “fish eyeing” on the applicator roller
- Does not leave that “blotchy” appearance on the printed sheet

USES and DIRECTIONS:

- Heatset web presses
- Dilute at 5% to 20% depending on application
- Easily Dilutable
- Great for In-line finishing to sheeter applications

Dilute to required levels for proper product use/consult manufacturer

TECHNICAL DATA:

Appearance: White emulsion

VOC Content: None

Density: 0.99 g/ml
